ELECTRIC FIREPLACES

Modern Blend of Realism Through Technology

The appeal and realism of electric fireplaces has come a long way over the years. And Fmi is at the forefront of electric fireplace technology and efficiency. It's an extremely economic way to add a fireplace feature to any home. Available in 18", 26", 32" & 36" models, each fireplace has realistic flame detail and is packed with features and convenience homeowners will love!

Each fireplace features colorful, random dancing flames and modulating coal bed with a mature-fire presentation of finely detailed logs. Select models feature patented Micro-Brite™ LED technology using 75% less electricity than other electric fireplaces. And to top it off, you never have to buy or replace light bulbs.

LEF36 - 36" Euclid Linear Fireplace

FEF18 - 18" Englewood Fireplace

FEF26 - 26" Englewood Fireplace

FEF32 - 32" Englewood Fireplace

Features include a hand-held remote control with storage nook built into the fireplace. Each fireplace also features a 5,000 BTU heater and adjustable flame, ember bed and ambient lighting controls. And since there's no gas, no flame, and no flue emissions of any kind, Fmi electric fireplaces are certainly the safest, and arguably most convenient to use of all fireplaces. Just hit the remote button for your total hearth enjoyment.
